# Foreword

The data presented in this report provide facts about the extent to which local, state, and national governments commit resources to public education. As one might expect in a nation as diverse as the United States – with respect to economics, geography, and politics – the level of commitment to education varies on a state-by-state basis. Thus, NEA Research offers this report to its state and local affiliates as well as to researchers, policy makers, and the public as a tool to examine public education programs and services.

Part I of this report – *Rankings 2020* – provides state-level data on an array of topics relevant to the complex enterprise of public education. Since the 1960s, *Rankings* has presented facts and figures useful in determining how states differ from one another – and from national averages – on important school statistics such as student attendance, teacher employment and average salary, and school revenues and expenditures. Of course, no set of tables tells the entire story of a state’s education offerings. Consideration of factors such as a state’s tax system, provisions for other public services, and population characteristics also are needed. Therefore, it is unwise to draw conclusions based solely on individual statistics in this report.

Part II of this report – *Estimates 2021* – is in its 76th year of production. *Estimates* provides data tables projecting public school enrollment, employment and compensation of personnel, and finances, as reported by individual state departments of education. Not surprisingly, interest in the improvement and renewal of public education continues to capture the attention of the nation.

Part III of this report – *National Trends 2012-21* – presents summary data of national trends in student enrollment and attendance, staff salaries, sources of school funding, and levels of educational expenditures in the previous ten years. Such trends at the national level have been based on data reported state by state.

Public education in the United States is a joint enterprise between local, state, and federal governments. Yet, progress in improving public education stems primarily from the efforts of state education agencies, local districts, and individual schools. These public organizations deserve credit for recognizing that spending for education needs to be acknowledged as an investment in our nation’s most valuable resource – students. Similarly, this publication represents a collective effort that goes well beyond the staff of the National Education Association. Individual state departments of education and the NEA’s state affiliates participate in collecting and assembling the data presented in this report. As a result, the NEA appreciates and acknowledges the cooperation it receives from all those whose efforts make this publication possible.

# Executive Summary

NEA Research collects, maintains, and analyzes data on issues and trends affecting the nation's public education systems, their employees, and students. This report, *Rankings of the States 2020 and Estimates of School Statistics 2021*, contains data primarily based on information from state departments of education. Significant highlights of the report are below.

## Part I. Rankings 2020 Highlights

### Enrollment and Attendance

In fall 2019, U.S. public schools enrolled 50,189,401 students, a decrease of 0.1 percent from fall 2018. The largest percentage enrollment growth from fall 2018 to fall 2019 occurred in Nevada (2.0%), North Dakota (1.8%), and Idaho (1.6%).

Student enrollment declined in 21 states from fall 2018 to fall 2019. The greatest declines were in California (-1.7%), West Virginia (-1.6%), and Illinois (-1.4%).

The number of students in average daily attendance (ADA) decreased by 0.5 percent nationwide, from 46,971,105 in 2018-19 to 46,733,252 in 2019-20.

### Classroom Teachers

U.S. public schools employed 3,214,673 teachers in 2019-20. Texas (363,195), California (293,619), and New York (212,777) employed the most teachers, while the District of Columbia (7,147), Wyoming (7,283), and Alaska (7,665) employed the fewest.

The average number of students enrolled per teacher decreased (-0.6%) from 15.7 in 2018-19 to 15.6 in 2019-20. States with the highest number of students enrolled per teacher in fall 2019 were Utah (22.7), California (21.0), and Nevada (20.8).

States with the lowest student-teacher ratios in fall 2019 were Vermont (10.4), New Hampshire (10.6), and North Dakota (11.1).

### Teacher Salary

The national average public school teacher salary for 2019-20 was \$64,133. State average teacher salaries ranged from those in New York (\$87,069), California (\$84,531), and Massachusetts (\$84,290) at the high end to Mississippi (\$46,843), South Dakota (\$48,984) and Florida (\$49,102) at the low end.

The national average one-year change in public school teacher salaries from 2018-19 to 2019-20 was 2.9 percent. The smallest one-year increase was in North Carolina (0.4%), and the largest one-year increase was in New Mexico (13.4%).

### School Revenue

State and local governments continue to be the primary sources of public school funding. State funds constituted 46.7 percent of public school revenue in 2018-19 and 47.1 percent in 2019-20. Local funds contributed similar shares in both 2018-19 (45.8%) and 2019-20 (45.6%). In those two years, federal funds constituted 7.5 percent and 7.3 percent, respectively, of K-12 education revenue.

## **Expenditures per Student**

The national average per-student expenditure in 2019-20 based on fall enrollment was \$13,597, a gain of 4.0 percent from \$13,078 in 2018-19. The following states had the highest per-student expenditures: New York (\$25,907), the District of Columbia (\$23,231), and New Jersey (\$22,097). Idaho (\$7,705), Utah (\$8,306), and Mississippi (\$9,181) had the lowest per-student expenditures.

## **Part II. Estimates 2021 Highlights**

### **Enrollment**

Public school enrollment is expected to decrease by an estimated 2.4 percent from 2019-20 (50,189,401) to 2020-21 (48,985,186).

### **Average Daily Attendance**

The number of students in average daily attendance is projected to decline by 2.0 percent from 46,733,252 in 2019-20 to 45,782,225 in 2020-21.

### **Instructional Staff**

The total number of instructional staff is expected to increase slightly by 0.2 percent from 3,808,920 in 2019-20 to 3,815,866 in 2020-21.

### **Classroom Teachers**

The number of public school classroom teachers is not expected to change significantly from 2019-20 (3,214,673) to 2020-21 (3,214,717).

### **Instructional Staff and Classroom Teacher Salaries**

The average salary of instructional staff is projected to increase to \$67,818 in 2020-21, a gain of 2.0 percent from 2019-20 (\$66,496).

The average classroom teacher salary for 2020-21 is projected to increase by 1.5 percent over 2019-20, from \$64,133 to \$65,090.

### **School Revenue**

State governments are expected to provide 46.7 percent of public school financial support for 2020-21, down 0.4 percentage points from 2019-20. For 2020-21, the federal government's contribution to public elementary and secondary school revenues is estimated to be 7.4 percent, versus 7.3 percent in 2019-20. In 2020-21, the contribution from local government is an estimated 45.9 percent, a slight increase from 45.6 percent the previous year.

### **Student Expenditures**

Expenditures per student in fall enrollment are projected to increase by 4.8 percent to \$14,243 in 2020-21, up from \$13,597 in 2019-20. This rate compares with a 2.2 percent increase in total current expenditures.

## Part III. National Trends 2012-21 Highlights

### School Districts

The number of school districts decreased slightly by 0.1 percent, from 16,503 in 2011-12 to an estimated 16,483 in 2020-21. Of these 16,483 school districts, 16,253 (98.6%) are operating school districts.

### Fall Enrollment

Public school enrollment registered a decline of 0.5 percent from fall 2011 (49,241,047) to fall 2020 (48,985,186).

### Average Daily Attendance

The total number of students measured by average daily attendance decreased by an estimated 1.1 percent over the past decade, from 46,281,487 in 2011-12 to 45,782,225 in 2020-21.

### Instructional Staff

Public schools employed an estimated 3,815,866 instructional staff in 2020-21, an increase of 7.8 percent compared to 3,539,644 in 2011-12.

### Classroom Teachers

The number of K-12 classroom teachers is estimated to be 3,214,717 in 2020-21, an increase of 4.6 percent compared to 3,072,596 in 2011-12.

### Instructional Staff and Classroom Teacher Salaries

The national average instructional staff salary for 2020-21 is estimated at \$67,818, representing a gain of 17.1 percent since 2011-12 (\$57,903).

The average classroom teacher salary is estimated at \$65,090 for the 2020-21 school year, an increase of 16.1 percent over \$56,062 in 2011-12.

### Inflation-adjusted Salaries

Significant differences exist between average salaries in current dollars versus constant dollars. Current-dollar growth over the years since 2011-12 has been substantial for both instructional staff and classroom teachers. In contrast, when the effects of price inflation are considered, the average classroom teacher salary increased only slightly by an estimated 0.9 percent from 2011-12 to 2020-21, while the average salary for instructional staff grew by an estimated 1.8 percent.

### Total Receipts

Total national public school revenue and nonrevenue receipts for 2020-21 are estimated at \$853.7 billion, an increase of 34.3 percent since 2011-12. When adjusted for inflation, total receipts increased an estimated 16.7 percent over the decade.

### Revenue Receipts

From 2011-12 to 2020-21, public school revenue receipts rose by an estimated 34.0 percent. Adjusting for inflation, these revenues increased 16.5 percent over the decade.

During this 10-year period, the share of state funding ranged between 45.4 and 47.6 percent of total revenue receipts. State education resources increased by 37.7 percent from school year 2012 to 2021, but increased 19.7 percent when adjusted for inflation. Local governments contributed similar shares of school revenue receipts as the state governments.

From 2011-12 to 2020-21, the federal share dropped from 10.1 to 7.4 percent. Federal resources decreased by 1.1 percent in current dollars and 14.1 percent when adjusted for inflation.

### **Total Expenditures**

The total amount to be spent for current expenditures, capital outlay, and interest payments increased 32.3 percent from 2011-12 to 2020-21. Adjusting for the effects of price inflation, total expenditures increased by 14.9 percent over the decade.

### **Current Expenditures**

Current expenditures for public schools grew from \$526.3 billion in 2011-12 to \$697.7 billion in 2020-21, a 32.6 percent increase. Current expenditures grew by 15.2 percent during the 10 years in inflation-adjusted dollars.

### **Current Expenditure per Student in Enrollment**

Over the last decade, average per-student expenditure rose by 33.3 percent from \$10,688 to \$14,243. After inflation adjustment, the expenditure per student in enrollment increased by 15.8 percent.

### **Current Expenditure per Student in Average Daily Attendance**

Average expenditure per student in average daily attendance increased 34.0 percent from \$11,371 in 2011-12 to \$15,240 in 2020-21. The average expenditure increased by 16.5 percent over the decade after being adjusted for inflation.

## Technical Notes

The first part of this publication, *Rankings 2020*, contains ranking statistics of public elementary and secondary schools for the 50 states and the District of Columbia. The education data are the most recent actual or estimated data collected primarily from state departments of education. All tables on schools and students, teachers and instructional staff, school revenues, and education expenditures have been updated from the previous edition.

The second part, *Estimates 2021*, presents public school data for the 50 states and the District of Columbia based on survey responses from state education agencies. State department of education contacts are asked to provide estimated data for the current year (2020-21) and revisions to six years of historical data, as necessary. Therefore, data for school years 2014-15 through 2019-20 were subject to revision as a result of the 2020 surveys. The estimated data featured in this report are for the current school year (2020-21) and the previous school year (2019-20). These data are provided on a state-by-state basis. All figures represent projections by state education agencies – or NEA Research – as of February 2021.

NEA Research submits current-year estimates of educational statistics to each state’s Department of Education for verification or revision each year. The figures are generated primarily using time series analyses, which are standard statistical techniques designed to make predictions for the current year using numerical data from prior years. If an education department does not replace these projections with its own estimated data and NEA Research cannot find an equivalent source of data on the state department of education website, this report uses an estimate generated either from a time-series model that uses past *Rankings & Estimates* data or from one of two sources: the American Community Survey (ACS) for average salaries, or NCES for non-salary data points. Which estimate source is used depends on NEA’s knowledge of an individual state’s trends and policy actions over time, the quality of that state’s existing *Rankings & Estimates* data, and the size of the state, as ACS data are most accurate for states with larger populations.

The last part, *National Trends 2012-21*, highlights summary public school statistics for the United States over the last decade on students, teachers and instructional staff, school revenues, and education expenditures.

NEA Research has calculated salary estimates using American Community Survey data for states that have not reported such data for some years.

Note that throughout this publication school years may be indicated in several equivalent ways. More specifically, the school year from September 2019 through June 2020 may be shown as “2019-20,” or it may be indicated by shorthand as “2020,” or “20.”

Also note that some totals in certain tables may not sum exactly because of rounding. Dollar values are expressed in “current dollars” unless otherwise noted.

The Consumer Price Index for all Urban Consumers is applied for computation of constant dollar salary, revenue, and expenditure data.

# Glossary

**Average Daily Attendance (ADA):** The aggregate attendance of a school during a reporting period divided by the number of days school is in session during this period. Only days on which the pupils are under the guidance and direction of teachers should be considered as days in session. The average daily attendance for groups of schools having varying lengths of terms is the sum of the average daily attendances obtained for the individual schools.

**Average Salary:** The arithmetic mean of the salaries of the group described. This figure is the average gross salary before deductions for Social Security, retirement, health insurance, and so on.

**Capital Outlay:** An expenditure that results in the acquisition of fixed assets or additions to fixed assets, which are presumed to have benefits for more than one year. It is an expenditure for land or existing buildings, improvements of grounds, construction of buildings, additions to buildings, remodeling of buildings, or initial, additional, and replacement equipment.

**Classroom Teacher:** A staff member assigned the professional activities of instructing pupils in self-contained classes or courses or in classroom situations. The number of classroom teachers is usually expressed in full-time equivalents.

**Current Expenditures:** The expenditures for operating local public schools, excluding capital outlay and interest on school debt. These expenditures include such items as salaries for school personnel, fixed charges, student transportation, school books and materials, and energy costs.

**Current Expenditures for Other Programs:** Current expenses for summer schools, adult education, post-high-school vocational education, personnel retraining, and community services; services to private school pupils, community centers, recreational activities, and public libraries, and so on, when operated by local school districts and not part of regular public elementary and secondary day-school programs.

**Debt:** The major portion of all state and local government debt constitutes long-term indebtedness. A substantial portion of such long-term debt is nonguaranteed debt (i.e., obligations payable solely from pledged earnings of specific activities or facilities, from special assessments, or from specific nonproperty taxes).

**Education:** The provision or support of schools and other education facilities and services.

**Elementary School:** A school classified as elementary by state and local practice and composed of any span of grades not above grade 8. A preschool or kindergarten school is included under this heading only if it is an integral part of an elementary school or a regularly established school system.

**Enrollment:** A cumulative count of the number of pupils registered during the entire school year. New entrants are added, but those leaving are not subtracted.

**Expenditures:** All amounts of money paid out by a government—net of recoveries and other correcting transactions—other than for retirement of debt, investment in securities, extension of credit, or as agency transactions. Expenditures include only external transactions of a government and exclude noncash transactions, such as the provision of perquisites or other payments in kind. Aggregates for groups of governments exclude intergovernmental transactions among the governments involved.

**Fall Enrollment:** The count of the pupils registered in the fall of the school year, usually in October.

**Full-Time Equivalent Employment:** A computed statistic representing the number of fulltime employees that could have been employed if the reported number of hours worked by part-time employees had been worked by full-time employees. This statistic is calculated separately for each function of a government by dividing the “part-time hours paid” by the standard number of hours for full-time employees in the particular government and then adding the resulting quotient to the number of full-time employees.

**High School Graduate:** A person who receives formal recognition from school authorities for having completed the prescribed high school course of study; excludes equivalency certificates.

**Instructional Staff:** Full-time equivalent number of positions, not the number of different individuals occupying the positions during the school year. In local schools, instructional staff includes all public elementary and secondary (junior and senior high) day school positions that are in the nature of teaching or in the improvement of the teaching-learning situation. Includes consultants or supervisors of instruction, principals, teachers, guidance personnel, librarians, psychological personnel, and other instructional staff. Excludes administrative staff, attendance personnel, health services personnel, clerical personnel, and junior college staff. In institutions of higher education, includes those engaged in teaching and related academic research in junior colleges, colleges, and universities, including those in hospitals, agricultural experiment stations, and farms.

**Interest on Debt:** Annual expenditures to pay interest only on long-term debt.

**K-12:** Kindergarten through 12th grade. Used for convenience of abbreviation in the Rankings tables; comprises “Elementary School” and “Secondary School” as defined in this glossary. Thus, as is the case for “Elementary School,” K-12 here may include preschool and/or kindergarten but only if it is an integral part of an elementary school or a regularly established school system.

**Noninstructional Staff:** In local schools includes administrative and clerical personnel, plant operation and maintenance employees, bus drivers, and lunchroom, health, and recreational personnel engaged by school systems. In institutions of higher education includes cafeteria, clerical, and custodial workers in colleges and universities, hospitals, agricultural experiment stations, and farms.

**Nonoperating School District:** A school district that does not provide direct instruction for pupils but contracts with or pays tuition to other districts.

**Nonrevenue Receipts:** The amount received by local education agencies from the sale of bonds and real property and equipment, loans, and proceeds from insurance adjustments.

**Operating School District:** A school district that directly provides instruction for pupils by hiring its own staff.

**Revenue:** Revenue receipts for public school purposes derive from three main sources:

*Local.* Local, intermediate, and other sources include all funds for direct expenditures by local and intermediate districts for school services, for the operation of intermediate departments of education, for employer contributions to retirement systems and/or Social Security on behalf of public school employees, for the purchase of materials for distribution of local school districts, and so on. Includes net receipts from revolving funds or clearing accounts only when such funds are available for general expenditure by the local board of education. Includes gifts and tuition and fees received from patrons.

*State.* Revenue receipts from state sources include all funds for the operation of the state department of education, for state (employer) contributions to retirement systems and/or Social Security on behalf of school employees, for grants in aid to intermediate and local school districts for school purposes (including funds available from state bond issues for such grants and the costs of textbooks, buses, supplies, etc., purchased by the state for distribution to local school districts), for the payment of interest on state bonds issued to provide grants to local school districts, and all other state revenue for public school purposes. Money collected by the state as an agent of a lesser unit and turned over in like amounts to that unit is not included.

*Federal.* Revenue receipts from federal sources include money distributed from the federal treasury either directly to local school districts or through the state and county, including grants for vocational education, for aid to federally affected areas, for school lunch and milk programs, for educating Native Americans in local public schools, and money derived from federal forest reserves and federal oil royalties.

**School District:** An education agency at the local level that exists primarily to operate public schools or to contract for public school services. Synonyms are “local basic administrative unit” and “local education agency.”

**Secondary School:** A school comprising any span of grades beginning with the next grade following an elementary or middle school (usually 7, 8, or 9) and ending with or below grade 12. Both junior high schools and senior high schools are included.

**Student-Teacher Ratio:** The number of students in the fall enrollment divided by the number of classroom teachers.

**Total Expenditures:** Includes all current expenditures, capital outlay, and interest on the school debt.

**Total Revenue Receipts:** Includes all revenue receipts available for expenditure for current expenses, capital outlay, and debt service for public schools, including all appropriations from general funds of federal, state, county, and local governments; receipts from taxes levied for school purposes; income from permanent school funds and endowments; income from leases of school lands; interest on bank deposits; tuition; gifts; and so on. Amounts that increase the school indebtedness or that represent exchange of school property for money are excluded.

## State Notes for Rankings and Estimates

The NEA recognizes that each state's department of education (DOE) has its own system of accounting and reporting for state executive and legislative branch purposes. As a result, it is not always possible to obtain completely comparable data for every state. For this reason, NEA Research encourages each state DOE to include any clarifying information that is necessary for a proper interpretation of the data supplied. In response, state education departments have provided clarifying and explanatory information. NEA Research has calculated salary estimates using American Community Survey data for the states that have not reported such data for some years.

**ALASKA:** Alaska does not compute ADA, only Average Daily Membership (ADM). Hence, reported figures are NEA estimates.

**CALIFORNIA:** California's data is derived from the annual report Salary and Benefits Schedule for the Certificated Bargaining Unit (Form J-90). Participation in the annual survey used to compile this information is voluntary and thus there is less than 100 percent reporting of all school districts and county offices. Charter schools are not part of this survey. California's data reflects the average salary that is paid to an employee on the certificated salary schedule. The average salary is determined by dividing the total salary schedule cost by the total certificated full-time equivalent (FTE) employees that are paid on the salary schedule. This may include certificated employees such as nurses, librarians, and counselors in addition to teachers. The average represents scheduled salaries only and does not include salaries for extended year, bonuses for special accomplishments or payment for extra-curricular services such as coaching, drama, or music. Bonuses for master's or doctorate degrees are included only if the amounts are an integrated characteristic of a salary schedule column.

**CONNECTICUT:** Salary estimates have been calculated from American Community Survey for school years since 2016-17.

**DISTRICT OF COLUMBIA:** Salary estimates have been calculated from American Community Survey for school years since 2013-14.

**ILLINOIS:** Salary estimates have been calculated from American Community Survey for school years since 2014-15.

**MONTANA:** Salary estimates have been calculated from American Community Survey for school years since 2010-11.

**MISSOURI:** School district count includes charter schools in Kansas City and St. Louis. Instructional staff may include duplicated numbers as a teacher can teach in both elementary and secondary levels.

**NEVADA:** Nevada collects and reports average daily attendance rates, not the numbers. Hence, reported figures are NEA estimates.

**NEW JERSEY:** Salary estimates have been calculated from American Community Survey for school years since 2011-12.

**NEW YORK:** New York City districts are reported as one district. The New York Department of Education does not report ADA; hence, NEA estimates are used.

**NORTH CAROLINA:** Salary averages include various supplementary pay, bonuses, and benefits, as detailed in the annual Highlights of the North Carolina Public School Budget report released by the North Carolina Department of Public Instruction.

**RHODE ISLAND:** Salary estimates have been calculated from American Community Survey for school years since 2010-11.

**SOUTH DAKOTA:** The contracted staff at Abbot House, Ombudsman, and Mitchell High School technical education classes were included in these figures.
